

Driving Salvage Process and Analytics

The information or process needed to make a total vs. repair decision is not always at your fingertips. Determining the anticipated salvage value may currently involve phone calls to salvage vendors, visiting salvage vendor websites, or using static formulas. Furthermore, this process typically requires the re-keying of information. It is a manual and time-consuming process that creates many pain points for insurers including:

- > Inefficiencies in the claims process
- > Increased salvage processing cycle time
- > Lower customer satisfaction

Introducing CCC Valuescope Salvage Management™ Solutions—an integrated solution with a total vs. repair comparison tool, automated assignment, status updates and management reporting.

The Potential Benefits of an Integrated and Intuitive Data Driven Solution

CCC VALUESCOPE SALVAGE MANAGEMENT™ SOLUTIONS:

- > *Total vs. Repair Comparison*—Enables better repair vs. total loss decisions by providing more information and comprehensive data at the point of the decision
- > *Reporting*—Provides visibility to key performance metrics
- > *Salvage Assignment and Workflow*—Helps decrease cycle time by automating the workflow and connecting you to your salvage partners
- > *Integrated*—Seamlessly connects to CCC Pathways® Estimating Solution, CCC Valuescope® Claim Services and MyCCCPortal through CCC Autoverse® Claim Management

The screenshot displays the 'SALVAGE ASSIGNMENT' form within a web application. The title bar reads 'CNVT 4-1.8L-T - bhat, rinku - Salvage Disposition'. The interface includes a menu bar with 'File', 'Edit', 'View', and 'Help'. Below the menu is a toolbar with icons and a search field. The main navigation area contains tabs for 'Admin', 'Vehicle', 'Estimate', 'Images', 'Event Log', 'Summary', 'Notes', 'Rates', 'Total Loss', 'Salvage', and 'Correspondence'. The 'Salvage' tab is active, and the 'Assign. Details' sub-tab is selected. The form is divided into several sections: 'Salvage Vehicle Pick-up Location' with fields for Type, Name, Contact, and Address; 'Advance Charges' with fields for Towing, Labor, Miscellaneous, and Tax; 'Storage' with fields for Start Date, Days, Rate, and Totals; and 'Pick-up Hold Note' with a checkbox and a 'Keys with the car' dropdown. A blue callout box highlights the 'Salvage Assignment' menu item, and a separate 'Salvage Assignment' menu is shown with 'Create', 'Update', and 'Cancel' options.

When the decision must be made to repair or total a loss vehicle, choose CCC Valuescope Salvage Management Solutions.
